

Audio

All Audio settings are controlled via the **AV Controller** app on the tablet. You can find it on the home screen,

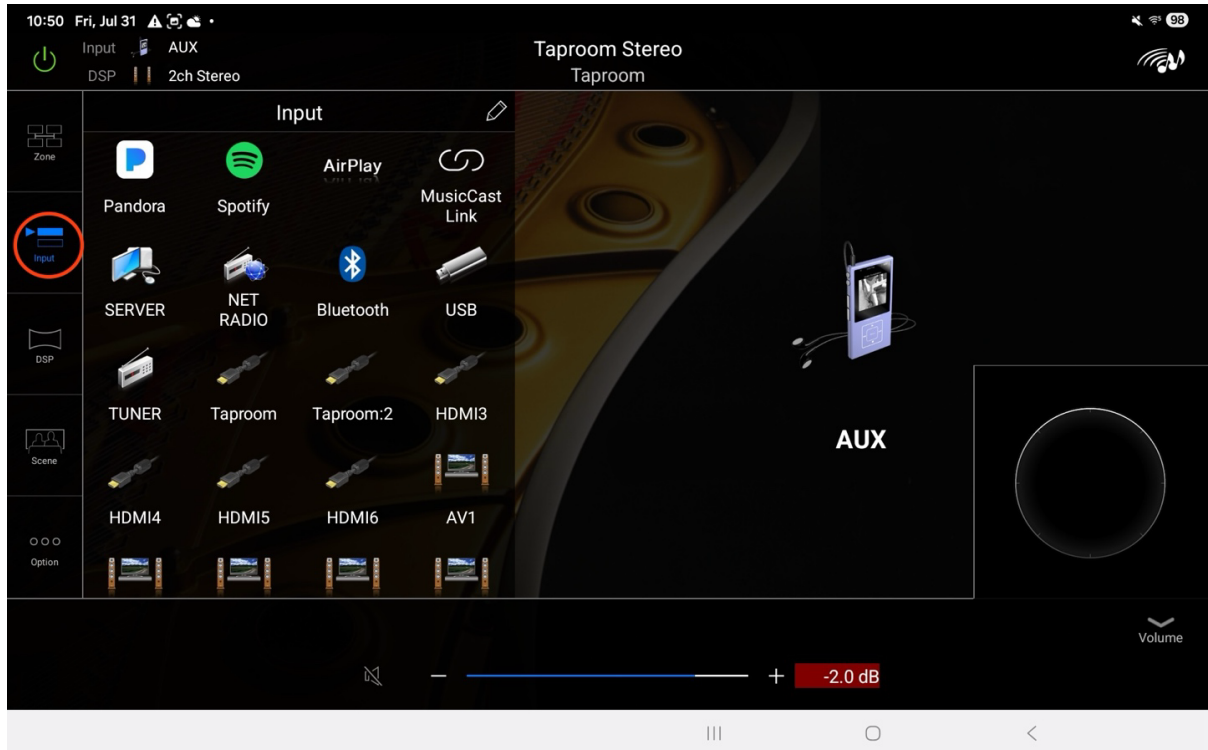

Or you can find it in the quick access menu if you swipe out the little white notch on the left-hand side of the screen

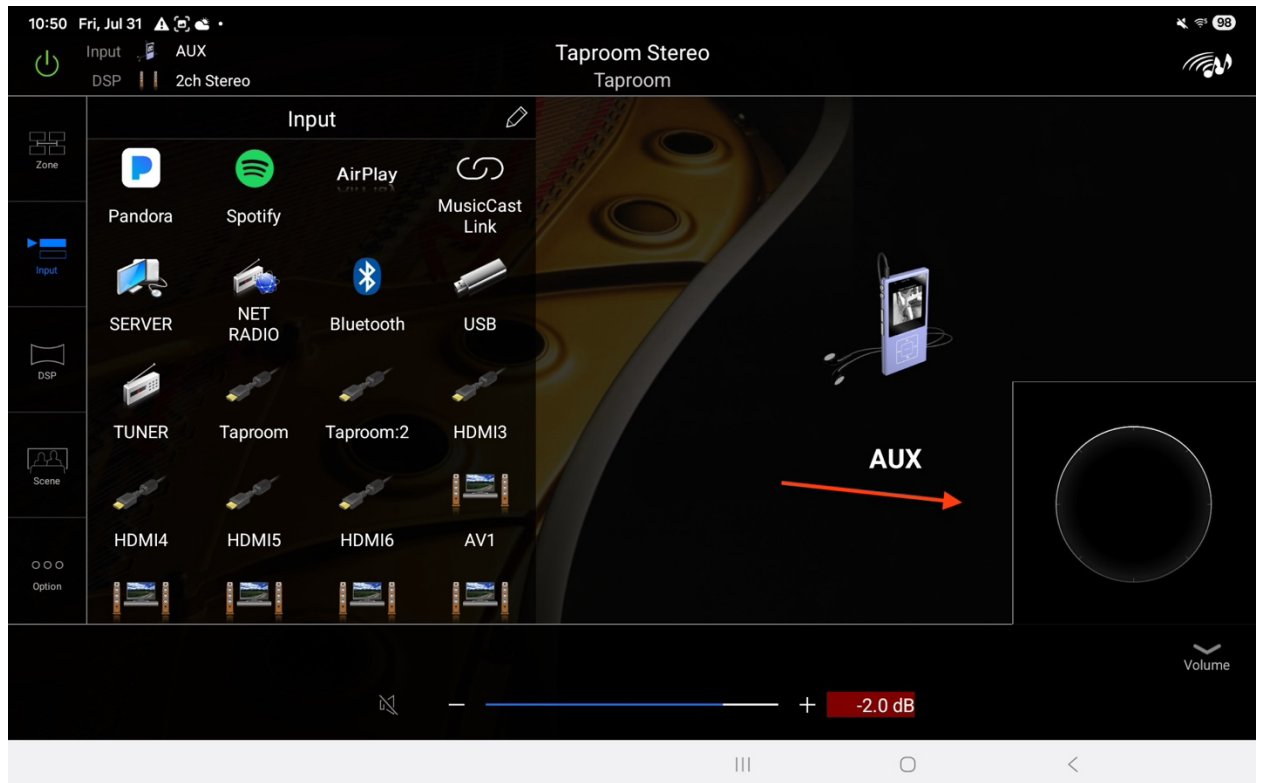

Music

- All the playlists we generally play in the taproom are downloaded in Spotify on the tablet in the office. If you want to make a change to what is playing, be sure to do so on that tablet.
- To make Spotify audio play from the speakers, open the **AV Controller** app on the POS tablet, go to inputs, and select **AUX**

- Volume is controlled via a little wheel that pops up when you click the **Volume** arrow in the bottom-left corner as seen below

TV Audio

- If you want audio from either the Apple TV or the cable box to come out of the speakers, open the **AV Controller** app, go to inputs, and select **AV1**
- From here, the audio from whatever is played on both the big TV and the tv above the slushy machine should come through the speakers.
 - o *Audio coming from the TV is usually quite a bit louder than the audio coming from Spotify, so make sure to turn the volume down a bit before you switch from AUX to AV1*

Video

Switching Inputs

- In the office, there is an HDMI splitter, the small black box on top of the receiver. If you want to switch between the Apple TV and the Cable box, just press the small grey button labeled "input."

Apple TV

- If you want to watch live TV using the Apple TV, use Hulu. We have a Live subscription. Just make sure you're using the Lively profile.
- If you want to watch anything else, feel free to do so. Just make sure you're not playing anything that wouldn't be appropriate for the taproom (nudity, heavy gore, etc.)
- In case any of the apps we have subscriptions to are logged out, here's a list of the login credentials for those services:
 - o Hulu
 - Username: info@livelybeer.com
 - Password: Livelybeer2018

Menu

- If you need to log back into the menu computer, grab the keyboard/trackpad combo in Nick's office and enter these credentials:
 - o Username: livelybeerworks@gmail.com
 - o Password: Livelybeer2018
- Once you log back in, it should automatically reopen the menu page. If it's not fullscreen, just press F4 and it should put the webpage into fullscreen.
